

BABYPOD 2 (2021 spec) Infant Transport System™

- **Side-opening lids** – a split-lid opens up each side of the unit
- **Easy visibility and access to the baby** – small opening window flaps in the upper lids allows easy access to the baby during transport whilst maintaining temperature inside the Pod
- **CO2 evacuation improves baby's air supply quality** – an external inlet point on the head-end of the Pod allows air or oxygen mix to be fed into the unit, thereby diminishing any build-up of CO2
- **Easy access for clinical monitoring** – large access areas for tubing & cables now allow more medical equipment to be simultaneously used
- **Revised trolley strapping system** – uses high-tensile webbing and metal quick-connect buckles all tested to 9kN, suitable for both air and road transport. Straps are now attached to and accessible from the outside of the Pod, making cleaning quicker and easier
- **Safer snug cocoon area for precious cargo** – vacuum mattress has slots in edges to allow the internal positioning straps to be fed through the mattress, thereby allowing the straps to better secure the mattress around the baby.

The New BabyPod 2 (2021 spec) is the successor to the hugely popular BabyPod II infant transportation system, but now incorporating a number of improvements and new features previously introduced on BabyPod 20.

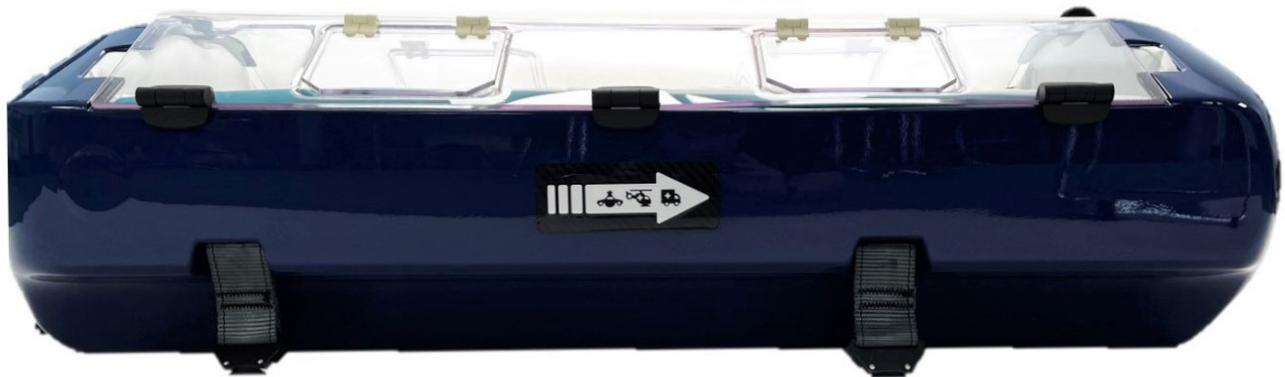

Utilising the same lid side-opening method as the original BabyPod II, but now further strengthened for improved durability, the new BabyPod 2 also includes features such as CO2 evacuation port, improved fixing of the inner foam padding, an improved finish internally and externally, and aircraft-rated 9kN trolley fixing straps for both air and road use.

BabyPod 2 shell has been designed and dimensioned to ensure it fits inside cupboards and storage areas that BabyPod II fitted into, ensuring backwards compatibility to existing vehicles.

BABYPOD 2 (2021 spec)

Infant Transport System™

Features & Benefits

- **Simple to transport** – easily lifted in and out of vehicles, optional carry bag also available
- **Unrivalled stability** – using vacuum mattress and patient-positioning safety straps
- **Exceptionally versatile** – ideal for use in hospital transfers, relief operations, emergency midwifery call-outs, neonatal revival cases, in ambulance, car or air transfers
- **Convenient to use** – needs no electricity, maintain temperature by use of TransWarmer heat pads
- **Proven performance** – crash tested to EN 1789 and CEN compliant. Fixing restraints tested to 9kN, for use in aircraft.
- **Highly compatible** – will fit on all models of ambulance trolley, can be used with all major ventilators enabling the addition of improved O2 environment
- **Cost-Saving** – at a cost that is less than 20% of a standard transport incubator, with reduced oxygen consumption due to its compact interior and lighter due to its carbon fibre construction

Specifications

LENGTH	1000 mm
WIDTH	420 mm
HEIGHT	280 mm
WEIGHT incl. vacuum mattress	8.5 kg
CAPACITY	2 - 8 kg / 4 - 17 lbs

Made of Carbon fibre
Four Layers of Protection
Carbon Fibre (F1) Shell
Shock-absorbing laminated foam interior
Unique design Vacuum positioning mattress
Vibration absorbing Gel warming mattress

Approvals and compliance:
CE and FDA approved
CEN compliant, dynamically crash tested to BS EN 1789
ISO 9001:2000 Quality Management
ISO 13485:2016 Design + Manufacturing of Medical Devices

Accessories

- Replacement Vacuum Mattress BPOD2-002

- Replacement Shock Absorbent Foam Set BP2-005

- Replacement Lid Set BP2-007

- Additional Positioning Straps (single use) BPOD2-003

- Additional 9kN Trolley Fixing Straps BP20-006

- Protective Storage Bag BP2-013

- Vacuum Pump BPOD2-020

Part Numbers

BP2-001 BabyPod 2 (2021 spec), includes Vacuum Mattress, Shock Absorbent Foam Set, Infant Positioning Straps (single use), Stretcher Fixing Straps, Protective Dust Cover and 1 TransWarmer

BP2-013 Protective Storage/Caddy Bag for BabyPod 2

BPOD2-020 Hand Vacuum Pump for BabyPod vacuum mattress (BabyPod II, BabyPod 2 & BabyPod 20)

BPOD2-002 Replacement Vacuum Mattress (BabyPod II, BabyPod 2 & BabyPod 20)

BPOD2-003 Additional single-use Infant Positioning Strap Set (BabyPod II, BabyPod 2 & BabyPod 20)

BP2-005 Replacement Shock Absorbent Inner Foam Set for BabyPod 2 only

BP20-006 Replacement Trolley Fixing Strap Set, metal buckles, tested to 9kN (BabyPod 2 & BabyPod 20)

BP2-012 Replacement protective dust cover for BabyPod 2 only

BP2-007 Replacement Lid for BabyPod 2 only

TRANS06 Additional TransWarmer heating pads (pack of 6)
