FERNO SPED II

Spinal Protection Extrication Device

For over 40 years the KED set the standard for the extrication device to use for suspected vehicle spinal and neck injury accidents. From this original concept we have created SPED, an amazing leap forward in extrication safety, incorporating vacuum mattress immobilisation technology.

- **Low Friction Material** - easier deployment when introduced in between the patient and seat
- **Colour Coded Strapping** - buckles and straps stored within the device ensuring easy deployment by avoiding tangling of loose straps
- **Vacuum Immobilisation Technology**-within seconds the device becomes rigid, moulding to patients' contours
- **Integral Spinal Stiffening Ribs** - gives maximum support during extrication
- **Integrated Head Immobilisation** - superior C-spine immobilisation helps reduce risk of further injury whilst moving the patient
- **Seven Lifting Handles** - provides more points of access for better lifting and manoeuvrability

Part Number	
23005001001	Ferno SPED II, "ReadytoGo" complete with introducer, restraint strap re-locator, repair kit +carry bag
