

## Ferno SlideLock - Features

1. Provides the flexibility of where trolley can be positioned in a vehicle
2. Allows a vehicle to be quickly & easily re-configured to accommodate a bariatric trolley, such as Harrier LT-LBS or Megasus with the cotsides extended
3. Alter lock position 'on-the-fly' to accommodate POWERX with bariatric Split-Scoop surface extender kit attached or with SX cotsides fully deployed horizontal

SlideLock

## Ferno SlideLock - Operation

To move the trolley lock between the 2 positions:

1. Lift the plunger located on the head-end section of the lock (Spike)
2. Slide the Spike over to the left (or right), letting go of the plunger once it has started to move
3. Continue to move all the way over to the other side and it will lock in position with a positive 'click' sound
4. Do the same with the foot-end section, lifting the levers on both sides of the lock and then slide across to the other locking position, letting go of the levers once it has started moving
